

Environmental management is an integral part of Paull and Warner Resources (PWR) business.

PWR are a leading Australian supplier and fabricator of emergency response vehicles; supplier of medical and emergency response equipment; provider of emergency response and industrial safety training; provider of emergency response, medical and security personnel; and provide the design, installation and maintenance of fire detection and occupant warning systems, fixed and mobile fire suppression systems and portable firefighting equipment. We are committed to protecting the environment from our business operations and to continuously improving our processes to minimise our environmental footprint and promote sustainability where possible (e.g. pollution and waste).

To fulfil our commitments, PWR will:

- Respect and protect the natural environment
- As a minimum, comply with all relevant legislative and regulatory requirements, Codes of Practice, and industry standards
- Develop, implement, and maintain a comprehensive and robust environmental management system
- Conduct our activities in such a way to maintain the integrity of the natural environment by limiting our environmental footprint through pollution reduction/prevention strategies
- Conduct audits and inspections, set performance objectives (see Objectives & Targets) and measure progress to ensure continuous improvement of the environmental management system
- Prescribe environmental specific responsibilities in employee job descriptions
- Identify relevant environmental training for its employees where appropriate
- Promote our commitment to good environmental management and awareness to all interested parties, utilising PWR consultation and communication procedures to develop an informed and responsible environmental culture

Simon Paull
Managing Director
